

Serving an even broader market...!!

At Evergreen Concepts we constantly do our best to serve the complete market in new homes and cottages. From very small, cost effective cabins to large luxury country homes, our motto is to never say that “it’s too small or too different”. In fact, just recently, we introduced a new series of cabin kits called “econo packages”. This series shows how possible it is for even the smallest of cabin dreams to become economically possible.

No one gains experience in this industry by working in a lumber store. Knowing lumber is one thing but actually becoming a building professional and designer requires years of training and education with on site day to day challenges. At Evergreen, we are such a group of professionals that use innovative custom design services, budgeting advice and products to ensure that all clients get the absolute best value out of the industry. We listen and adapt to clients’ needs and provide sound budget advice from the very beginning.

Also, we are proud to an-

nounce that the crew at Evergreen has teamed up with Tayside Developments in order to design and create the ultimate in cost effective luxury country living along our beautiful Tay River in Perth. Tayside Estates has released PHASE 1 and many large and beautiful lots are still available. You could enjoy 1.8 kms of Tay River frontage on the north and scenic vistas of Grant’s creek to the south. This subdivision only utilizes 40% of the land leaving a trail system

and shoreline for only Tayside Estates residents to enjoy. We encourage you to come and visit this unique sub-division and would certainly enjoy discussing the great possibilities that exist there with our help... from FREE site evaluations to full construction management.

Come and visit our 3 models off hwy #7 between Perth and Carleton Place. Check out our websites for details: www.evergreenconcepts.ca and www.cabinkits.ca. Tel: 613 267-6721.
